Yashaswini Jain

Hyderabad, India | +91 8307860958 | jainyashaswini466@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Software Engineer and Technical Instructor with experience in backend-focused development, full stack web technologies, AI evaluation, and technical mentorship. Experienced in JavaScript, Node.js, React, REST APIs, authentication, asynchronous systems, and backend engineering while mentoring aspiring software engineers.

Strong foundation in problem solving through consistent LeetCode practice and algorithmic problem solving. Skilled in JavaScript internals, object oriented programming across Java, C++, and JavaScript, and simplifying complex technical concepts.

Core Skills

Programming Languages: JavaScript (ES6+), Java, C++, SQL, HTML5, CSS3

Data Structures & Algorithms: Arrays, Linked Lists, Trees, Graphs, Hashing, Binary Search, Dynamic Programming, Sliding Window, Greedy Algorithms, Complexity Analysis

Frontend Development: React.js, Redux Toolkit, Tailwind CSS, Responsive Design

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, WebSockets, Socket.IO

Node.js Engineering: fs, path, streams, pipelines, crypto, OS, child processes, worker threads, event emitters, asynchronous programming

Computer Science Fundamentals: Object Oriented Programming, DBMS, Operating Systems, Computer Networks

Teaching & Mentorship: Lecture Delivery, Live Coding, Technical Mentorship, Code Reviews, Mock Interviews, Project Guidance

Tools: Git, GitHub, VS Code, Postman, Vercel

Industry Experience

Software Developer & Instructor, AccioJob Sept 2025 – Present

- Deliver structured lectures on Data Structures and Algorithms, JavaScript, Node.js, React, and Full Stack Development.
- Conduct live coding sessions covering JavaScript internals, asynchronous programming, backend engineering, APIs, authentication, and real-time applications.
- Guide learners through building full stack applications from scratch across multiple development batches, including JWT authentication, Node.js backend modules, filesystem operations, streams, pipelines, and Socket.IO.

AI Evaluation & Research Contribution

Humanity's Last Exam (HLE) — AI Benchmark Contributor 2025

- Contributed an expert-level question to Humanity's Last Exam, an AI benchmark evaluating advanced models on challenging knowledge and reasoning tasks.
- Submission was selected among the top 550 contributions and received a $500 award.
- Gained practical exposure to AI evaluation, benchmark design, and assessing model reasoning and knowledge capabilities.

Technical Projects

Authentication & Profile Management Application

Developed a comprehensive full-stack application from scratch, demonstrating strong command of **React.js**, **Node.js**, and **Express.js** through secure **JWT authentication**, protected routes, profile management, and RESTful APIs. Engineered backend workflows using Node.js **fs**, **Streams**, and **Pipelines** for efficient file and data processing, while implementing real-time communication with **Socket.IO**, including rooms, broadcasting, and connection lifecycle management. Integrated **MongoDB** for persistent data management and end-to-end application workflows.

Education

Manipal University Jaipur

Master of Computer Applications (MCA) 2023 – 2025
